

Comagine Imaging Authorization Process Change

Please Register to Attend Training via Zoom

Comagine Health is introducing a NEW Alaska Medicaid imaging assessment questionnaire requirement effective October 1, 2020. This new imaging assessment questionnaire, AK Imaging Assessment (B), or “Trigger Assessment” will automatically populate based on your selections when completing the Alaska Imaging Assessment (A).

Completion of this brief trigger assessment will be required when it populates, in order to move forward with the submission of your imaging prior authorization (PA) request. We will also review imaging PA request provider portal submissions, utilizing the correct provider portal URL, and documentation requirements.

Please plan to attend one of the available training sessions to learn about this new imaging assessment and the modification to the current imaging assessment.
