### Remittance Advice (RA) Message

Title: **Update: Implementation of Vaccine Requirements in Alaska**

Date: 01/20/2022

Run Length: 6 weeks

Provider Type(s): All

Message: The State of Alaska is still reviewing the implications of the U.S. Supreme Court staying the enforcement of two preliminary injunctions that has stopped the Centers for Medicare and Medicaid Services (CMS) from implementing and enforcing, effective January 13, 2022, its vaccine requirement for certain facilities and providers who receive CMS funds. CMS issued [guidance on the timeline for enforcement](#) and [attachments](#) for facilities and providers in the 25 states, including Alaska, that were not subject to the compliance phases published on December 28, 2021. In the interim, we recommend you seek advice from your own legal counsel, as the State of Alaska cannot provide any definitive legal advice for providers.
