Message: The Alaska Medicaid COVID-19 At-Home Test Pharmacy Billing Guidance is now available at: <http://manuals.medicaidalaska.com/docs/updates.htm>. COVID-19 at-home test kit availability at pharmacies is dependent upon product availability. Medicaid-enrolled pharmacists may generate a prescription, with no refills, and submit a claim to Alaska Medicaid using the pharmacist's NPI number. Pharmacies may also dispense COVID-19 test kits from another licensed prescriber, such as a physician, PA, or APRN. Members are limited to two test units per day and a maximum of eight test units per month.
