Message: In 2016, Senate Bill 74 mandated the implementation of multiple specific demonstration projects, collectively known as the Coordinated Care Demonstration Project, to test the efficacy of new models of care in Alaska. The Department of Health and Social Services has contracted with United HealthCare, a managed care organization, to provide a managed care program for Medicaid beneficiaries within the Municipality of Anchorage and Matanuska-Susitna Borough. For details about this managed care project, please see the provider flyer "United HealthCare: Alaska Managed Care Plan" available on the Provider Updates page at <http://manuals.medicaidalaska.com/docs/updates.htm>.
